Adhesive Performance

The adhesive features normal initial tack and ultimate bond on a wide variety of substrates, including apolar, slightly rough and curved substrates.

AP103 is suitable for applications where compliance with FDA 175.105 is required. This section covers applications where for indirect or incidental contact food, cosmetic or drug products.

Applications and use

The products are suitable for a wide range of promotional and industrial label applications where attractive semi-gloss appearance in multi-color work is required.

Typical applications include sales promotion, outside the box, etc,.. It's suitable for flat, including plastic film and HDPE container, it should be full evaluated for rough surface of cardboard, corrugated paper, etc. Not recommended on large curved substrates and small bottle labeling. Not recommend on the PVC substrates.

The above does not represent any guarantee or warranty and the Purchaser must independently determine the suitability of the products for the Purchaser's purposes.

Conversion/printing

This super-calendered semi-gloss face-stock provides excellent printing quality by all the usual printing techniques, whether single or multi-color, line or process color printing.

Cares should be taken with the ink viscosity during printing process, too high viscosity of ink will damage the surface of paper.

It will cause the label bleeding if the press of rewinding roll is large.

Not suggestion for large area of solid printing.

Not suggestion for extremely fine bar coding design.

Shelf life

One year when stored at 23 ± 2°C at 50 ± 5% RH.
